STEPS ON HOW TO USE THE PROJECTOR
WITH A LAPTOP

1) Begin by turning on the projector using the provided remote.

2) Attach the VGA cable to the back of your laptop.

3) The projector will project your screen when the laptop comes on.

4) If the projector doesn’t communicate with the laptop screen, press the Fn button and F8 (for Dell laptops).

Note: Not all laptops use the same functions, look for the little monitor symbol or CRT/LCD functions usually one of the “F” keys. Toggle the keys till both the monitor and projector comes up at the same time.

For information regarding audio/visual equipment on campus, please contact the computer lab at (818) 767-0888 x401.
